GOODS & PERSONS ELEVATORS – 1,0T – 1,45mx1,4m – 1,6m – 0,36m

Developed and manufactured for both the real estate business and factories, this goods and persons elevator with embarked people TLD 2000 is driven by a PLC (EdmoLift UC60 electronics) that operates the sequence in dead man's control, only allowing the gates to open when the platform is in lower or upper position. Positioning is given by the upper and lower limit switch.

The platform has an extra layer of anti-slip chequered aluminium. This will ensure a non-slippery, corrosion free surface for both the passengers and the load.

It is equipped with remote power pack with steel cover. This enables accessible maintenance and uncomplicated visual inspection.

This project also includes an additional gate with electric interlock for the upper level.

The PLC offers a guidance during fault tracing by connection a service control unit with buzzer functionality. The buzzer indicates the problem by giving different sequences, easy to translate and circle the problem.

This goods & persons elevator is used to move staff and goods within industrial buildings and real estates between two levels.

By investing into this goods and persons elevator with a capacity of 1000 kg, equipped with a 1,45mx1,4m platform, you'll benefit from a lifting stroke of 2,4m and a closed height of 0,36m.

Feel free to contact us for further information about potential modification that would suit the specifications of your project.
