## CAR LIFT – 3,5T – 5,6mx2,5m – 2,4m – 0,69m

Developed and manufactured for the real estate business, this cars elevator with embarked people TF 4500 is driven by a PLC that controls the full sequence including the lifting and lowering between two (2) levels and the activation of all installed safety features.

The platform is guided by steel profile to ensure a smooth travel in between the two levels.

It is equipped with photocells to secure positioning of the car, secured doors, radiocontrol unit (ensuring the driver can operate the car elevator from his car), phone equipped command board, special platform and a safety frame.

It is equipped with a emergency lowering system in case of power failure.

The PLC offers a maintenance mode that allows trained technicians to do the routine maintenance operations and/or activate manually all safety features.

This cars elevator is used to move the cars within a apartments building from the level 0 to the parking.

By investing into this cars elevator with a capacity of 3500 kg, equipped with a 5.6mx2.5m platform, you'll benefit from a lifting stroke of 2,4m and a closed height of 0,69m

**Feel free to contact us** for further information about potential modification that would suit the specifications of your project.
